

Mr Daniel Guspan  
IPEX Board Chair  
National Council of the Slovak Republic

03.10.2017 No 3-8/17-17/46

**Interconnectivity of COSAC web-page and  
IPEX platform for electronic exchange**

One of the objectives of inter-parliamentary cooperation in the European Union is to promote the exchange of information and best practices between the national parliaments of the European Union. Different electronic platforms and social media tools allow us to exchange information in a more effective and open ways.

IPEX has set itself an aim in a Digital Strategy for IPEX to provide *inter alias* also information from national parliaments concerning the parliamentary dimension of EU Council Presidencies. One important cooperation format that enriches the parliamentary dimension of EU presidencies is the Conference of the committees of the national Parliaments of the European Union Member States dealing with the European Union affairs (COSAC).

In this light I would like to encourage you to analyse and also propose the ways to interconnect COSAC web-page and IPEX platform. When IPEX integrates the information from other parliamentary conferences and events concerning the parliamentary dimension it would be necessary to incorporate also the same information concerning COSAC conferences. This would create more synergy between two key sources of EU information shared at the parliamentary level.

Sincerely yours,

Toomas Vitsut  
Chairman of the EU Affairs Committee  
Parliament of Estonia
