population of each Member State *as well as on its GNI per capita in PPS*. Such a maximum financial contribution shall be available for allocation to each Member State, in part or in full, at each stage and call of the allocation process set out in Article 10.

Or. en

### *Justification*

*GNI seems to be more appropriate as it allows to distribute resources in more fair way, taking into account the goals of the RSP (cohesion). GNI takes into account incomes of households and the standard of living whereas the GDP reflects the economic activity of the given MS and can be biased by the stock/flows of the capital investments.*

##### *Amendment*

Annex X lays down a maximum financial contribution available for each Member State out of the overall financial envelope referred to in point (c)(i) of Article 7(2). Such maximum financial contribution is calculated for each eligible Member State using the criteria and ***an appropriate*** methodology set out in that Annex, based on population of each Member State ***and respective GDP per capita***, and applies for each of the allocation stages and calls set out in Article 10.

Or. en

##### *Justification*

*Corresponding changes should be reflected in the Annex. Criteria should be equally taken into account - 50% based on number of the population and 50% based on GDP per capita.*
